Foreword

The 2012 Annual Statistical Review is a snapshot of the Island's economy, population and social make-up. There are a number of interesting facts found throughout its more than 100 data tables, including details of our province's economic performance in 2012.

These data tables give us current, as well as historic, socio-economic information about Prince Edward Island. Over the years, we have found it to be an indispensable reference on the Island population and its economy. As a government, we use the information found in the Annual Statistical Review to make some important policy decisions. It helps us determine where, and when, programs and services are needed.

The information within the Annual Statistical Review is compiled from a variety of sources, including, provincial government departments, the private sector and Statistics Canada.

The information we receive from Statistics Canada is important, and significant. I remain concerned about the federal government decision to abolish the mandatory long-form census. This is the first year we are relying upon data gathered through the "voluntary" National Household Survey. The data is not as complete as it has been and I sincerely hope that the federal government will look at reinstating the long-form version for the 2016 census.

Despite this challenge, the people within our Statistics Bureau were able to gather enough facts and figures to complete a 2012 Review. I would like to personally thank them for their hard work and diligence.

All statistics have references to their original source. I encourage you to consult these documents if you seek further information on a particular topic of interest.

A Historical Note

Before the European explorations, Prince Edward Island was frequently used by the Mi'kmaq People for fishing, hunting and some planting. The Mi'kmaq called the island *Epekwitk*, meaning "cradle on the waves." Europeans later changed the pronunciation of the name to *Abegweit*. Historians credit the European discovery of the Island to Jacques Cartier, the French navigator, who claimed the Island for Francis I, King of France, on July 1, 1534. In 1720 the Island, then called *Île Saint Jean*, was colonized by 300 French settlers, sponsored by a commercial company of the Comte de Saint Pierre. The Island was ceded to Great Britain in 1763. Two years later the designated capital city of the *Island of St. John* took on the name *Charlotte Town* in honour of Queen Charlotte, wife of King George III of England. In 1799 the colony was renamed Prince Edward Island in honour of Edward, Duke of Kent, who was then commander of the British forces in North America. Prince Edward Island is known as the "Cradle of Confederation", because the Charlottetown Conference, held there in 1864, initiated the movement toward Canada's federation. The Island became a province in 1873.

The Armorial Bearings[1] of the Province of Prince Edward Island, shown above, were proclaimed to come into force on December 13, 2002. The centrepiece is the Shield of Arms, granted by King Edward VII in 1905, featuring the English heraldic lion, a large oak tree on the right and three young saplings on the left. The mature tree originally represented England, while the three saplings stand for the three counties - Kings, Queens and Prince. Scrolled along the bottom of the Shield of Arms are the Latin words *Parva Sub Ingenti*, which, when translated, read: *The small under the protection of the great.* The surrounding elements of the Armorial Bearings illustrate significant characteristics of the province, its position in the Canadian federation, its founding peoples and its natural resources.

1 Description of the Armorial Bearings on this page, and the provincial flag and bird on the following pages, is adapted from the government publication The Symbols of Prince Edward Island.

Samuel Holland's Survey of the Island of St. John
Captain Samuel J. Holland surveyed and mapped Prince Edward Island, then known as the Island of St. John, between 1764 and 1766. During the survey, Holland used innovative instruments such as the astronomical clock and the refracting telescope. His work was so accurate that many of the boundaries for lots and parishes he mapped are still used today. (Image: National Library and Archives Canada).

After contributing positively to economic growth through all of 2011, goods industries saw a slight decline in the second quarter of 2012, however rebounded in the final two quarters to see an annual increase of 1.6 per cent over 2011.

Data presented in these tables are *2011 Census counts* and NOT *population estimates*. The adjusted population estimate for Prince Edward Island on July 1, 2012 was 146,105.

Note 1: For historical and statutory reasons, shelter occupancy on Indian Reserves does not lend itself to the usual classification. Therefore, in 1991 a special category *Band Housing* was created.

Note 2: The average number of children per family is calculated using the total number of children at home and the total number of census families.

r: revised data

Notes: Urban area data are based on an area of residence between 30,000 and 99,999 persons.

Low income cut-offs (LICOs) are quite different from measures of poverty and Statistics Canada does not endorse their use as such. LICOs are used to delineate family units into "low income" and "other" groups. A family unit with income below the cut-off for its family size and urbanization classification is considered a low income family. Any family with income equal to or above the cut-off is considered in the "other" category.

In this table, the low income cut-offs are the same since 1976 because they are expressed in constant dollars.
